Sample Agenda & Tips for a Primary School Program

Primary School Grades K – 4

Tips
1. Plan on spending only about ten or fifteen (10 – 15) minutes maximum talking with any one class.

2. Have handouts to give to the kids (hand these out last or they will be a distraction). These can be coloring pages or even company literature.

3. Have a truck delivered to the school location during the morning for the start of the program.

4. Plan on the presentation being random. Young kids can be all over the board.

5. Start with simple questions and build on them.

Agenda
1. What is concrete – the basics of concrete: sand, rock, water, cement

2. Display samples of each raw material in a sealed container

4. How does the truck and plant work?

5. Final Questions

6. Handouts
