CONCRETE DELIVERS
Free Pavement Design Assistance*

No matter how you are involved in paving processes—as an elected official, building owner, facilities manager, or public works director—the right choice in pavement selection is more important than ever.

When selecting pavements, consider the many issues that can cause big headaches, especially when potholes and other expensive street, road, and parking area repairs and maintenance are needed.

We can help! We offer free concrete pavement design assistance, including analysis of existing pavement designs.*

Consider the possibilities:
- Short and long-term cost savings. (We have the first costs and LCCA data to prove it.)
- Lower costs for installed lighting, and year-over-year electrical costs, too.
- Freedom from milling & filling, repairs, crack-sealing, sealcoating, etc.
- A cooler, more reflective pavement that provides a superior look and feel to any pavement.

Take advantage of this free pavement design opportunity! Call 502.695.1535 or e-mail bruffing@krmca.org to learn more.
